SKILLS

BACKEND

FASTAPI (REST APIS, ASYNCHRONOUS ARCHITECTURES, SCALABLE SYSTEMS)

ARTIFICIAL INTELLIGENCE & ORCHESTRATION

LANGCHAIN (AI AGENTS, CHAINS, LLM INTEGRATION)

APPLIED GENERATIVE AI (AUTOMATION, NLP, INTELLIGENT

DATA EXTRACTION)

DATABASES

POSTGRESQL

DEVOPS & DEPLOYMENT

DOCKER (CONTAINERIZATION)

VPS DEPLOYMENT

GIT

FRONTEND

REACT.JS

KEY PROJECTS

TRAAF - Urban Transportation Management Application

- Designed and developed the backend using FastAPI
- Managed users, transportation flows, and operational data
- Built secure REST APIs with PostgreSQL integration
- Deployed containerized services using Docker on VPS

TAKAWAKE - AI-Powered Intelligent Scraping Platform

- Developed an automated data scraping platform powered by AI
- Orchestrated intelligent agents using LangChain
- Extracted, cleaned, and structured complex datasets
- Built high-performance FastAPI backend services

TELECO HEALTH - AI-Based E-Health Platform

- Developed an AI-powered telehealth platform
- Integrated generative AI features for assistance and automation
- Designed backend services with FastAPI and PostgreSQL
- Focused on data security and production-ready architecture

LANGUAGES

- French: Fluent
- English: Professional

PROFESSIONAL SUMMARY

Backend and Artificial Intelligence Software Engineer with over 3 years of experience in designing, developing, and deploying web applications and AI-based solutions. Strong expertise in Python, FastAPI, and AI agent orchestration using LangChain. Proven ability to deliver production-ready systems using containerized architectures, relational databases, and VPS deployments. Comfortable working in international and English-speaking environments

PROFESSIONAL EXPERIENCE

Generative AI Developer - KANARI

September 2023 - Present

- Developed backend APIs using FastAPI for AI-driven applications
- Integrated generative AI solutions into web products
- Designed and deployed AI agents using LangChain
- Collaborated with cross-functional teams (product, data, engineering)

LEMON AFRICA

January 2022 - May 2023

Network & Security Administrator (Training Program)

- Delivered cybersecurity awareness training to employees
- Assisted in implementing security protocols and best practices
- Supported network and system security operations

Volunteer - American Space

August 2021 - January 2022

- Assisted users with digital tools and computer systems
- Provided technical support and user guidance
- Built strong communication and customer interaction skills

EDUCATION

Bachelor's Degree in Web Programming - July 2022

ESMA | RIVIERA

Higher National Diploma (HND) in Computer Networks - September 2021

IFSM | COCODY
